
Simon 400

Round USB sockets for furniture

simon

Simon 400

Always going from one place to another is something that has been done since prehistoric times. Something that today has reemerged strongly in our work environment.

And being able to work in the tranquility of that corner and for two hours in the meeting room, is have a million offices in one.

It is making a static routine into a more dynamic and functional one. It's choosing where to sit based on the day, whether you need to concentrate or where the sun hits in the afternoon. It is choosing where to sit based on the agenda, the meetings or what is happening today. have to do.

It is returning to the origins.
It is to be again.

Simon presents Simon 400;
because the workplace changes every day.
