Floor

IP66 waterproof floor boxes

/ PROTECTION AGAINST ADVERSE ENVIRONMENTS

IP66

IK08

Simon's range of watertight floor boxes ensures a **robust, safe, watertight** installation, resistant to dust and a flow of water up to 1 kg/cm² in any direction.

/ TWO TYPES OF SCREED BOX:

Raised floor

Pavement

/ NEW DRAINAGE METHOD

The screed box **includes a drainage system** to drain off liquid accumulating in the socket and a **silicon tube** to connect to the sump and remove any possible condensation from the interior. The screed box is supplied with **watertight cones** to maintain IP protection for cable access and a **protective cover** to prevent aggregates entering when sweeping the floor.

/ NEW FINISHES AND A LARGER RANGE

Finishes to match current trends in floor coverings, offering perfect integration and elegant, sophisticated finishes.

Black finish
For indoor use only

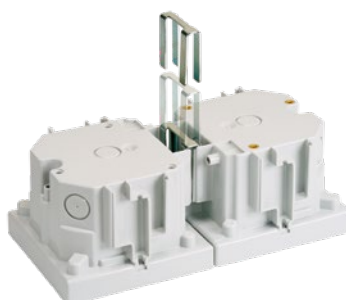

Stainless Steel finish
Used indoors and outdoors

The product range has extended, allowing to fit 1 or 2 45mm functions to double the functional capacity in one box.

/ EASY TO EXPAND

Option to join screed boxes on 3 of their 4 sides to offer more connection points. (Example of 2 floor screed boxes joined together.)
