INSTALLATION SYSTEM SUITABLE FOR ALL ENVIRONMENTS

Designed for quick installation in any type of environment. The wide range of solutions helps converge electrical connectivity, protection, and voice, data and multimedia solutions that can be installed quickly by directly clipping the solutions to the enclosure, without the need for accessories or tools.

ENCLOSURES

Floor boxes	4
Recessed into the floor	20
In furniture	28
Fixed and Recessed into the wall	42

WIRING DEVICES

Mechanisms and rockers	50
Bases and covers for socket outlets	54
Connectors and plates for voice and data connections	58
Mechanisms and plates for circuit protection	62
Connectors and plates for multimedia connections	64
Connectors and plates for quick connections	68
Other plates	70
Technical information	72

A WIDE RANGE FOR ALL NEEDS

Convergence of solutions for energy, voice, data, protection and multimedia in any type of wall, floor, ceiling or furniture installation. Carefully designed, high-quality enclosures prepared for daily use in spaces with high foot traffic.

FURNITURE - WALL - CEILING - FLOOR

INSTALLATION SYSTEMS FLUSH-MOUNT IN THE FLOOR

Bureaux

Salles de réunion

Auditoriums

Universités

Musées

Hôtels

1 / Window with safety stop:

Preventing footsteps from damaging the cables

2 / Cable routing lid:

Protects connecting cables and allows their passage

3 / Protective foam:

Protects the inside of the box against the ingress of dust and small objects

4 / Maintenance:

The trim plates can be removed to facilitate maintenance of connections without removing the box

5 / Screw fastenings:

Maximum assembly strength

6 / Metal divider plate:

Electromagnetic immunity guaranteed for Voice, Data and Multimedia (VDM) installation

7 / More pre-punched holes with different diameters for inlet tube:

Available around the perimeter of the box

8 / Cable tie inlets:

Enabling tubes and cables to be fixed using cable ties, to prevent disconnection

9 / Space for installing the floor finish:

The lid has a space with a thickness of 6 mm to match the hinged lid to the floor finish (carpet, parquet or other finishes)

STRONGER

Larger frame area to provide an extra margin of support. Corrects possible deviations generated during cutting the gap, also offering greater box stiffness.

GRIP® COVER

Trim cover finished with a concept combining differentiated design with functionality.

Its unique texture gives it non-slip properties, combining an attractive modern design while hiding chance scratches.

INTEGRATED DESIGN

Clean, compact design with new more stylish and minimalist lines.

The shapes come together in a single surface.

HIGHER MAXIMUM LOAD

Internal improvements to ensure higher load and compliance above the standard.

Simulation of the weak load points in the previous floor box (Fig. 1), and the results obtained with the new Simon 500 CIMA range of floor boxes (Fig. 2).

CABLE ROUTING LID ADAPTATION

The cable routing lid protects and allows the routing of the connecting cables. The improvements to its components allow cable routing with a convenient levelling of the lid when there are no protruding cables.

CONVENIENT OPENING SYSTEM

Opening the box is achieved by pulling both tabs at the same time, providing a satisfying feel with minimum effort.

This protection system minimises tampering.

ADJUSTABLE DEPTH FLOOR BOXES

i
INSTALLATION
SEQUENCE
IN CONCRETE
FLOORS

Installation in concrete floors needs to be carried out using plastic or metal tray

Using plastic tray

The whole space in the tray is occupied by the floor box. Cable entry can be performed through a corrugated tube or floor trunking.

Using metal tray

Availability of space between the floor box and the tray for passage of cables or tubes. Cable entry is through floor trunking.

Trim the trunking entries

Insert the trunking and screw to the floor

Level with screws

Cement

Fit the lining

Remove the protective cover

INSTALLATION SYSTEMS FLUSH-MOUNT IN THE FLOOR

ACCESSIBLE SPACE

Service boxes provide accessible space for access to the installation's cables or connections.

SERVICE LID IN RAISED FLOOR

Installing service lids in raised floors gives access to the inside of the installation.

GROMMET FOR RAISED FLOORS (Ø102 MM)

Allows cable passage from below the raised floor to the surface. Once closed, prevents ingress of dust or other elements

THE PERFECT SOLUTION FOR SHALLOW FLOORS

1 / Trim

For a perfect finish (optional)

2 / Cover

The cover has a thickness of 6 mm to customize the hinged cover with the floor finish (carpet, parquet or other finishes). With 3 opening positions (box with 3 double modules) and 2 separate rubber grommets.

3 / Versatile pre-punched holes

The mechanism-holders have punched holes for 10 mm and 20 mm tubes and two spaces for threading voice and data cabling.

4 / Mechanism-holders

Plug&Play mechanism-holders modules that allow quick and easy installation.

5 / Shallow

Perfect solution for shallow floors.

6 / Concrete floor tray

Required element for concrete floor installation. It is not required for raised floor installation.

SHALLOW

The perfect solution for shallow floors, raised or pavement.

INTEGRATES INTO ANY SPACE

The angle of the mechanisms allows the cover to be closed with the box connected, concealing the connections

COMPATIBLE WITH HIGHER CATEGORIES

Thanks to the angle of the mechanisms and the pre-punched inlet holes, there are no bends in the Voice, Data and multimedia cabling.

ADJUSTABLE TO CHANGES IN OFFICE FURNITURE

Thanks to the two separate cable outlets and the different opening positions of the cover, it can be adapted to changes in furniture location.

Terraces

In open-plan outdoor areas, casual connections are often available, which require additional protection against high foot traffic or when exposed to inclement weather. When closed, the IP66 rating keeps the solutions fully isolated from knocks and external elements like dust, liquids and humidity.

PREPARED FOR HARSH ENVIRONMENTS

PROTECTION

**IP66****Total dust
protection****Withstands water
jets of 1 kg/cm² in any
direction**

**CAN BE COMBINED
WITH SIMON 44
AQUA SEALED
WALL BOXES**

ONE TRAY FOR EACH FLOOR TYPE

Raised floor

Concrete

SEALED FLOOR BOX FOR INSTALLATION IN RAISED FLOOR

For installation in garden and **terrace raised flooring, wood flooring, parquet, etc.**

The bevelled tray fastens the box and prevents possible installation defects.

Installation using fastening claws, which ensure anchoring to the box.

SEALED FLOOR BOX FOR INSTALLATION IN PAVEMENT

Allows flush-mount installation of the box in **all types of pavement (porcelain stoneware, terrazzo, ceramic, etc.).**

Floor box groupings

Option to group the boxes around the entire perimeter of the tray to allow more than one connection point.

A MECHANISM HOLDER FOR EVERY ENVIRONMENT

Security lock

Ideal to restrict access to connections
In public spaces

Manual closure

Suitable for less demanding environments

IP66 SEALED FLOOR BOXES- FEATURES

REINFORCED COVER

Cover reinforced against lateral impact.

Brass

Stainless steel.

MAXIMUM STRENGTH

When connected, it supports foot traffic and protects the cable from pressure and tension.

When closed, it supports a maximum load of 1,000 kg.

SECURITY COVER

The hinge opens less than 90°, which **keeps it from being accidentally left open** and posing a trip hazard.

ELECTRICITY, VOICE AND DATA IN A SINGLE BOX

Wide range of mechanism holders that incorporate a German socket outlet and an RJ45 connector, or the housing for installing it.

PROTECTIVE FILM.

The frame of the mechanism holder has a **protective film** to keep it clean and to protect it from being damaged during installation.

INSTALLATION SYSTEM

The design of the tray allows installation of a tube to drain any condensation from the interior. The tray is supplied with a wooden cover to prevent aggregates entering during installation.

DEMANDING ENVIRONMENT SOLUTIONS

Direct snap-fit

Airports

Shopping centres

Sports centres

Industrial facilities

Warehouses

Mechanical workshops

Maximum strength: The combination of the aluminium structure hardened with epoxy coating and coated with a thick stainless steel frame provides a balance of mechanical strength and appearance.

CLIPPING K45 SOLUTIONS

Compatible with every function in the range: electrical socket outlets, protective elements, plates for V&D and multimedia.

VOICE, DATA AND MULTIMEDIA INSTALLATION

The enclosures are **57 mm deep**, to accommodate the bending radius and to facilitate cable routing during installation.

RESTRICTED ACCESS TO THE CONNECTIONS

The lockable protective cover restricts access to the connections and **ensures that the cabling is routed to the electrical devices** (vending machines, printers, etc.).

ATTACHMENT TO THE FRAME

Allen stainless steel screws are used for security (requiring a specific wrench to disassemble it), and its design is perfectly flush with the structure.

EASY INSTALLATION AND MAINTENANCE

Individual frame holders that clip onto the bracket and, using linkable parts, **can formed into blocks**, separating the electrical components from the voice and data components.

CAN BE COMBINED WITH SIMON 27 SCUDO

workstations

POWER

The K45 anodised aluminium mini columns are installed directly on the floor using the attachment feet and are powered through cabling recessed into the floor or under the raised flooring

INSTALLATION

With a **single item number**, the Simon K45 mini column is supplied with everything needed for its installation: the foot for attaching it to the floor, a top cover, side panels and other miscellaneous materials.

POWER SUPPLY THROUGH FLOOR TRUNKING

The ALKA02/8 adaptor allows K45 mini-columns to be installed in the floor trunking baseboard and powered via 85x18 and 130x18 mm floor trunking.

FUNCTIONAL DESIGN

With the OFIBLOCK LINE K45 frame, connections are perfectly integrated into furniture and accessible for use.

EASY TO INTEGRATE.

Rear cable inlets allow installation in any piece of furniture that is at least 10 mm wide.

EASY, SECURE INSTALLATION

The bracket fits into the frame from the back and stays securely in place thanks to the four locking tabs.

Allows solutions in different finishes /8/ /9/ /14

INTEGRAL DESIGN

Frame with straight lines and minimalist aesthetic that integrates into any piece of furniture.

OFIBLOCK LINE

SPECIFIC CONNECTIONS

DUAL SURFACE-MOUNT BOXES

INCLUDES ALL NECESSARY MATERIALS

The K45 **dual-surface box** comes with a **divider plate**, fixing plugs and all the necessary screws.

ACCESSIBLE VIA SIMON MINI TRUNKING

The SCM21F/9 and SCM31F/9 accessories allow access via 20x30 and 20x50 mm Mini-trunking

INDIVIDUAL RECESSED JUNCTION BOX

CAN BE COMBINED WITH DEEPER RJ45 CONNECTORS

Specially designed for installing FTP connectors and high categories where the depth and the bending radius are critical.

The necessary depth is achieved by installing a recessed junction box and a surface box.

SOLUTIONS FOR OPEN-PLAN AREAS

EASY TO INSTALL

Pole fastening by applying **pressure** against the ceiling, without needing to screw it into the floor.

WIDE VARIETY OF RANGES

There are four bracket types with a different number of connection sides, allowing many solutions to be grouped together.

INSTALLATION MOBILITY

This pressure-fastened columns allow the layout of workstations to be changed easily.

SUPPLIED WITH ALL THE MATERIALS NEEDED FOR INSTALLATION

With a **single item number**, K45 columns are supplied with everything needed to install them: the foot for attaching it to the floor, the ceiling trim, a telescopic assembly for attaching it to the slab, the aluminium covers and other miscellaneous materials.

COLUMNS

1 SIDE

ART. NO.		DESCRIPTION
ALK1100	/8	1 side, 70x60 mm, 3 meters

The length of the 1-sided columns cannot be lengthened with extensions
A longer column can be supplied upon request.

2 SQUARE SIDES

ART. NO.		DESCRIPTION
ALK2200	/8	2 square sides, 80x80 mm, 3 meters

Designed for electrical sockets with screw terminal connection on 1 side and VDM on the opposite side

2-SIDED SQUARE
COLUMN EXTENSION
(includes coupling pin)

ALK22P05	/8	0.5 m extension
ALK22P10	/8	1 m extension

Offices

Health centres

Conference centres

Shopping centres

Laboratories

Educational centres

Specially designed for spaces with a high density of luminaires, since most support a 16AX rated current. For offices, hospitals, conference rooms, etc., since they support current peaks that occur during switching on.

INDICATOR LIGHT OR PILOT LIGHT

Push-button switch with indicator light that helps it to be located in the dark.

2-way switch with pilot light: The pilot light indicates whether the switch is on or not.

DOUBLE-POLE 16AX SWITCHES

Disconnect the two poles from a load or circuit while minimising any problems **due to small leaks that may occur**, in fluorescent bulbs, for example, when using a single-pole switch.

90° POSITIONER

Allows vertical positioning of 2-way switches. Specially designed for installation in vertical enclosures (mini columns, columns, teleblocks, trunking, etc.)

BASES AND COVERS FOR SOCKET OUTLETS

Direct snap-fit

ONE-CLICK INSTALLATION

MULTIPLE SOCKET OUTLETS

The AC11 linking accessory allows the **direct linking of quick connection socket outlets** without having to wire them manually.

HIGH CONNECTION DENSITY

Contacts set at 45° to prevent any interference that might be caused by using elbowed plugs in a group of electrical socket outlets.

OBTURATOR FOR:

Protection

All socket outlets have a protective shutter to prevent direct contact with the live parts.

Selective security

Protects the UPS line, allowing only computer **equipment to be connected**.

FAST TERMINAL CONNECTION USING SCREWS

Fast

Screw

Compatible with rigid and flexible 2.5 mm² cable.

DIFFERENT FINISHES FOR DIFFERENT APPLICATIONS

Red finish

For connecting computer equipment through uninterruptible power systems.

Orange finish

Specifically for powering servers or laboratory devices.

Green finish

For the healthcare sector

Angled plates are ideal for **maintaining the optimal bending radius** when large connectors are used, and guaranteeing high-speed data transmission.

WE CARE ABOUT CONNECTORS

Plates with dust shutters that close automatically, helping to keep the contacts in the voice and data connector clean and ensuring optimum connection.

FLAT PLATES

The flat plates are designed to fully integrate into the enclosures.

FULLY COMPATIBLE

Simon's philosophy is to integrate existing connectors in the market into our enclosures.

ONE CONNECTOR FOR VARIOUS TYPES OF PATCH CORDS

The RJ11 and RJ12 patch cords can also be combined with female RJ45 connectors.

K45 technical Information

Plastic parts manufactured using halogen-free, self-extinguishing thermoplastic materials, guaranteeing no flame spread in case of fire and low toxicity in the event of smoke generation.

HALOGEN-FREE,
SELF-EXTINGUISHING
THERMOPLASTIC MATERIALS

SHALLOW FLOOR BOXES

- Product designed according to the Safety Requirements of Directive 2006/95/EC (Low Voltage) through compliance with UNE-EN-60670 standard.
- Product with CE marking **CE**.
- IP protection degree: 4X
- IK impact resistance degree: 08
- Temperature range during installation: -5 °C to +60 °C
- Maximum temperature during construction work of +90 °C (installed with service box)

OFIBLOCK PLUS

- Product designed according to the Safety Requirements of Directive 2006/95/EC (Low Voltage) through compliance with UNE-EN 60670 standard.
- Product with CE marking
- IP protection degree: 4X
- Temperature range during installation: -5 °C to +60 °C
- Maximum temperature during construction work is +60 °C
- Manufactured in anodised aluminium

Example TV-SAT installation on a branch

Single socket TV-SAT 5-2400 MHz Direct, consisting of:

- 1 IEC type male TV connector, Ø9.5 mm
- 1 type F female SAT connector

Technical features:

- Connection attenuation = 2 dB
- Maximum current pass = 24 V 500 mA (*)
- Cable diameter accepted = 4 - 7 mm
- Operating temperature range = 10 - 55 °C
- According to general standard EN 50083-4
- Male connector according to IEC 61169-2
- Female connector according to IEC 61169-24

(*) Passage of direct current and control signals (24 V 500 mA maximum) is permitted only through the female F connector (SAT).
